

# Phased School Reopening Health and Safety Plan Template

---

Each school entity must create a Health and Safety Plan which will serve as the local guidelines for all instructional and non- instructional school reopening activities. As with all emergency plans, the Health and Safety Plan developed for each school entity should be tailored to the unique needs of each school and should be created in consultation with local health agencies. Given the dynamic nature of the pandemic, each plan should incorporate enough flexibility to adapt to changing conditions. The templates provided in this toolkit can be used to document a school entity's Health and Safety Plan, with a focus on professional learning and communications, to ensure all stakeholders are fully informed and prepared for a local phased reopening of school facilities. A school entity's Health and Safety Plan must be approved by its governing body and posted on the school entity's publicly available website prior to the reopening of school. School entities should also consider whether the adoption of a new policy or the modification of an existing policy is necessary to effectively implement the Health and Safety Plan.

Each school entity should continue to monitor its Health and Safety Plan throughout the year and update as needed. All revisions should be reviewed and approved by the governing body prior to posting on the school entity's public website.

*This resource draws on a resource created by the Council of Chief State School Officers (CCSSO) that is based on official guidance from multiple sources to include: the Centers for Disease Control and Prevention, the White House, American Academy of Pediatrics, Learning Policy Institute, American Enterprise Institute, Rutgers Graduate School of Education, the World Health Organization, the Office of the Prime Minister of Norway as well as the departments of education/health and/or offices of the governor for Idaho, Montana, New York, Texas and Washington, DC.*

## Health and Safety Plan: Southern Fulton School District

All decision-makers should be mindful that as long as there are cases of COVID-19 in the community, there are no strategies that can completely eliminate transmission risk within a school population. The goal is to keep transmission as low as possible to safely continue school activities. All school activities must be informed by [Governor Wolf's Process to Reopen Pennsylvania](#). The administration has categorized reopening into three broad phases: red, yellow, or green. These designations signal how counties and/or regions may begin easing some restrictions on school, work, congregate settings, and social interactions:

- The Red Phase: Schools remain closed for in-person instruction and all instruction must be provided via remote learning, whether using digital or non-digital platforms. Provisions for student services such as school meal programs should continue. Large gatherings are prohibited.
- The Yellow Phase and Green Phase: Schools may provide in-person instruction after developing a written Health and Safety Plan, to be approved by the local governing body (e.g. board of directors/trustees) and posted on the school entity's publicly available website.

Based on your county's current designation (i.e., red, yellow, green) and the best interests of your local community, indicate which type of reopening your LEA has selected by checking the appropriate box in row three of the table below. Use the remainder of the template to document your LEA's plan to bring back students and staff, how you will communicate the type of reopening with stakeholders in your community, and the process for continued monitoring of local health data to assess implications for school operations and potential adjustments throughout the school year.

Depending upon the public health conditions in any county within the Commonwealth, there could be additional actions, orders, or guidance provided by the Pennsylvania Department of Education (PDE) and/or the Pennsylvania Department of Health (DOH) designating the county as being in the red, yellow, or green phase. Some counties may not experience a straight path from a red designation, to a yellow, and then a green designation. Instead, cycling back and forth between less restrictive to more restrictive designations may occur as public health indicators improve or worsen. This means that your school entity should account for changing conditions in your local Health and Safety Plan to ensure fluid transition from more to less restrictive conditions in each of the phase requirements as needed.

## Type of Reopening

### Key Questions

- How do you plan to bring students and staff back to physical school buildings, particularly if you still need social distancing in place?
- How did you engage stakeholders in the type of re-opening your school entity selected?
- How will you communicate your plan to your local community?
- Once you reopen, what will the decision-making process look like to prompt a school closure or other significant modification to operations?

### Based on your county's current designation and local community needs, which type of reopening has your school entity selected?

- Total reopen for all students and staff (but some students/families opt for distance learning out of safety/health concern).
- Scaffolded reopening: Some students are engaged in in-person learning, while others are distance learning (i.e., some grade levels in-person, other grade levels remote learning).
- Blended reopening that balances in-person learning and remote learning for all students (i.e., alternating days or weeks).
- Total remote learning for all students. (Plan should reflect future action steps to be implemented and conditions that would prompt the decision as to when schools will re-open for in-person learning).

**Anticipated launch date for in-person learning (i.e., start of blended, scaffolded, or total reopening): August 19,2020 February 8, 2021 April 20, 2021**

**\*At the April 20,2021 board meeting it was approved the school will switch to remote instruction for 5 calendar days if 15 students and staff test positive for COVID in a 14 day rolling period.**

## Pandemic Coordinator/Team

Each school entity is required to identify a pandemic coordinator and/or pandemic team with defined roles and responsibilities for health and safety preparedness and response planning during the phased reopening of schools. The pandemic coordinator and team will be responsible for facilitating the local planning process, monitoring implementation of your local Health and Safety Plan, and continued monitoring of local health data to assess implications for school operations and potential adjustments to the Health and Safety Plan throughout the school year. To ensure a comprehensive plan that reflects the considerations and needs of every stakeholder in the local education community, LEAs are encouraged to establish a pandemic team to support the pandemic coordinator. Inclusion of a diverse group of stakeholders is critical to the success of planning and implementation. LEAs are highly encouraged to make extra effort to engage representatives from every stakeholder group (i.e., administrators, teachers, support staff, students, families, community health official or other partners), with a special focus on ensuring that the voices of underrepresented and historically marginalized stakeholder groups are prioritized. In the table below, identify the individual who will serve as the pandemic coordinator and the stakeholder group they represent in the row marked "Pandemic Coordinator". For each additional pandemic team member, enter the individual's name, stakeholder group they represent, and the specific role they will play in planning and implementation of your local Health and Safety Plan by entering one of the following under "Pandemic Team Roles and Responsibilities":

- **Health and Safety Plan Development:** Individual will play a role in drafting the enclosed Health and Safety Plan;
- **Pandemic Crisis Response Team:** Individual will play a role in within-year decision making regarding response efforts in the event of a confirmed positive case or exposure among staff and students; or
- **Both (Plan Development and Response Team):** Individual will play a role in drafting the plan and within-year decision making regarding response efforts in the event of confirmed positive case.

**Key Strategies, Policies, and Procedures**

Once your LEA has determined the type of reopening that is best for your local community and established a pandemic coordinator and/or pandemic team, use the action plan templates on the following pages to create a thorough plan for each of the requirements outlined in the Pennsylvania Department of Education’s Preliminary Guidance for Phased Reopening of PreK-12 Schools.

For each domain of the Health and Safety Plan, draft a detailed summary describing the key strategies, policies, and procedures your LEA will employ to satisfy the requirements of the domain. The domain summary will serve as the public-facing description of the efforts your LEA will take to ensure health and safety of every stakeholder in your local education community. Thus, the summary should be focused on the key information that staff, students, and families will require to clearly understand your local plan for the phased reopening of schools. You can use the key questions to guide your domain summary.

For each requirement within each domain, document the following:

- **Action Steps under Yellow Phase:** Identify the discrete action steps required to prepare for and implement the requirement under the guidelines outlined for counties in yellow. List the discrete action steps for each requirement in sequential order.
- **Action Steps under Green Phase:** Identify the specific adjustments the LEA or school will make to the requirement during the time period the county is designated as green. If implementation of the requirement will be the same regardless of county designation, then type “same as Yellow” in this cell.
- **Lead Individual and Position:** List the person(s) responsible for ensuring the action steps are fully planned and the system is prepared for effective implementation.
- **Materials, Resources, and/or Supports Needed:** List any materials, resources, or support required to implement the requirement.
- **Professional Development (PD) Required:** In order to implement this requirement effectively, will staff, students, families, or other stakeholders require professional development?

In the following tables, an asterisk (\*) denotes a mandatory element of the plan. All other requirements are highly encouraged to the extent possible.

## Cleaning, Sanitizing, Disinfecting and Ventilation

### Key Questions

- How will you ensure the building is cleaned and ready to safely welcome staff and students?
- How often will you implement cleaning, sanitation, disinfecting, and ventilation protocols/procedures to maintain staff and student safety?
- What protocols will you put in place to clean and disinfect throughout an individual school day?
- Which stakeholders will be trained on cleaning, sanitizing, disinfecting, and ventilation protocols? When and how will the training be provided? How will preparedness to implement as a result of the training be measured?

### Summary of Responses to Key Questions:

**Building cleanliness-** The custodial and maintenance staff have been properly trained on cleaning and disinfecting.

**Cleaning implementation-** The custodial and maintenance staff currently utilize hospital grade cleaning products . The cleaning agents have the ability to kill germs associated with many viral strains including the coronavirus.

**Daily protocols-** Staff will clean high touch areas throughout the day. Additional staff have been contracted to assist as necessary.

**Stakeholder training-** All custodial and maintenance staff have been trained on cleaning and disinfecting techniques.

All cleaning products are environmentally friendly.</p>	<p>James Will- Assistant Building and Grounds Supervisor</p>	<p>Hillyard training</p>	<p>N</p>

**Social Distancing and Other Safety Protocols**

**Key Questions**

- How will classrooms/learning spaces be organized to mitigate spread?

- How will you group students with staff to limit the number of individuals who come into contact with each other throughout the school day?
- What policies and procedures will govern use of other communal spaces within the school building?
- How will you utilize outdoor space to help meet social distancing needs?
- What hygiene routines will be implemented throughout the school day?
- How will you adjust student transportation to meet social distancing requirements?
- What visitor and volunteer policies will you implement to mitigate spread?
- Will any of these social distancing and other safety protocols differ based on age and/or grade ranges?
- Which stakeholders will be trained on social distancing and other safety protocols? When and how will the training be provided? How will preparedness to implement as a result of the training be measured?

### **Summary of Responses to Key Questions:**

**Classroom/Learning Space organization-**The SFSD will be attempting to social distance when possible. Desks will be arranged 6 feet apart when feasible with a minimum of 3 feet to the extent possible within the classroom. All desks will be forward facing to minimize the transmission of germs.

**Grouping of Students-** The SFSD is following the CDC guidelines and limiting the amount of students in one communal area. There are times when students need to move throughout the building as part of their learning environment. Walking patterns will be established to keep students walking in one direction to minimize germ transmission.

**Communal Spaces-**High traffic areas will be cleaned by a variety of staff members. The cafeteria tables will be wiped between uses throughout the district. Faculty meetings will be offered online. In-Service days will have online options.

**Outdoor Spaces-** As weather permits, outdoor spaces will be used for physical education classes and lunch periods. Classes will be held outside with the permission of the building principal to further assist with social distancing.

**Hygiene Routines-** The SFSD will encourage families to assist with hygiene routines at home. If a student or staff member is ill they are encouraged to stay at home. Parents should check their child for elevated temperatures prior to their departure to school and keep children home when warranted. Hand sanitizer will be available throughout the buildings. Staff and students will be reminded of the necessity of frequent hand washing throughout the day.

**Transportation-**The SFSD will encourage parents to transport their children to school to minimize the spread of Covid-19. The district will be lenient in the arrival times for students due to the increase in traffic. Additional staff will assist at dismissal to accommodate student departure. Students will be seated with families and socially distanced to the extent possible.

The SFSD will provide bus contractors with Personal Protective Equipment necessary for maintaining a safe bus environment. Drivers and students will be required to wear masks while riding the bus. The SFSD is requesting that parents monitor their children prior to the departure to school and keep them home if signs and symptoms of illness exist.

**Visitors and Volunteers**-The SFSD understands the importance of family engagement within the educational setting. Non-essential visitors will be limited during the global pandemic. Visitors will be asked to self-screen prior to presenting to the school. Anyone who is experiencing signs and symptoms of illness should reschedule the visit to the school.

Requirements	Action Steps under Yellow Phase	Action Steps under Green Phase	Lead Individual and Position	Materials, Resources, and or Supports Needed	PD Required (Y/N)
* <b>Classroom/ learning space occupancy that allows for 3 feet of separation among students and staff throughout the day, to the maximum extent feasible</b>	The master schedules have been created in order to best accommodate the 3 feet recommendation from the CDC. Individual student desks will be spaced 3 feet apart and tables will not be permitted unless they can be spaced according to CDC guidelines. If the assigned learning space/classrooms cannot accommodate the students/teachers based on the 6 feet separation, common areas can be utilized as needed. ## Monitoring Student and Staff Health

### Key Questions

- How will you monitor students, staff and others who interact with each other to ensure they are healthy and not exhibiting signs of illness?
- Where will the monitoring take place?
- When and how frequently will the monitoring take place?
- What is the policy for quarantine or isolation if a staff, student, or other member of the school community becomes ill or has been exposed to an individual confirmed positive for COVID-19? What conditions will a staff or student confirmed to have COVID-19 need to meet to safely return to school? Which staff will be responsible for making decisions regarding quarantine or isolation requirements of staff or students?
- When and how will families be notified of confirmed staff or student illness or exposure and resulting changes to the local Health and Safety Plan?
- Which stakeholders will be trained on protocols for monitoring student and staff health? When and how will the training be provided? How will preparedness to implement as a result of the training be measured?

### Summary of Responses to Key Questions:

**Monitoring of Students:** Students will be encouraged to self-monitor for signs and symptoms of illness. Teachers will also monitor students. Those who require medical care will be referred to the Nurse's office. Monitoring will be ongoing.

**Guidelines for potential exposure to COVID-19-** See PDE guidance

**If your district is served by the Pennsylvania Department of Health, at present, given the continued high volume of COVID-19 cases across the Commonwealth, the Department of Health is unable to complete the public health protocols of contact tracing and case investigation faster than what is indicated in the matrix. As such, schools in a District served by the Department of Health should not close for a shorter time than specified in the matrix.**

## Other Considerations for Students and Staff

### Key Questions

- How will you determine which staff are willing/able to return? How will you accommodate staff who are unable or uncomfortable to return?
- How will you determine which students are willing/able to return? How will you accommodate students who are unable or uncomfortable to return?
- What is the local policy/procedure regarding face coverings for staff? What is the policy/procedure for students?
- What special protocols will you implement to protect students and staff at higher risk for severe illness?
- How will you address staff who are ill, or who have family members who have become ill?
- How will you ensure enough substitute teachers are prepared in the event of staff illness?
- How will the LEA strategically deploy instructional and non-instructional staff to ensure all students have access to quality learning opportunities, as well as supports for social emotional wellness at school and at home?

### Summary of Responses to Key Questions:

**Returning staff:** Staff that require work accommodations should discuss this with their immediate supervisor.

**Returning students:** Parents that do not wish for their child to return to school due to medical issues should contact their child's building principal to make alternate learning arrangements.

### Face Covering Guidelines:

**Illness:** Staff that become ill should notify their immediate supervisor. In the event a substitute is required, the employee's immediate supervisor will make those arrangements.

**Support for social emotional wellness:** Guidance counselors will support families, students and staff to provide support as needed. They will also help to facilitate alternate learning options for students.

## Health and Safety Plan Professional Development

The success of your plan for a healthy and safe reopening requires all stakeholders to be prepared with the necessary knowledge and skills to implement the plan as intended. For each item that requires professional development, document the following components of your professional learning plan.

- **Topic:** List the content on which the professional development will focus.
- **Audience:** List the stakeholder group(s) who will participate in the professional learning activity.
- **Lead Person and Position:** List the person or organization that will provide the professional learning.
- **Session Format:** List the strategy/format that will be utilized to facilitate participant learning.
- **Materials, Resources, and or Supports Needed:** List any materials, resources, or support required to implement the requirement.
- **Start Date:** Enter the date on which the first professional learning activity for the topic will be offered.
- **Completion Date:** Enter the date on which the last professional learning activity for the topic will be offered.

Topic	Audience	Lead Person and Position	Session Format	Materials, Resources, and or Supports Needed	Start Date	Completion Date
<b>Handwashing techniques</b>	Staff and students	Principals	Video	Hillyard video	August 2020	August 2020
<b>Cleaning and disinfecting</b>	Custodians	James Will	Demonstration	Hillyard	May 2020	August 2020
<b>CDC Guidelines</b>	Administration	Tara Will	Verbal and online	CDC	June 2020	ongoing
<b>PDE Guidelines</b>	Administration	Tara Will	Verbal and online	PDE	June 2020	ongoing

## Health and Safety Plan Communications

Timely and effective family and caregiver communication about health and safety protocols and schedules will be critical. Schools should be particularly mindful that frequent communications are accessible in non-English languages and to all caregivers (this is particularly important for children residing with grandparents or other kin or foster caregivers). Additionally, LEAs should establish and maintain ongoing communication with local and state authorities to determine current mitigation levels in your community.

Topic	Audience	Lead Person and Position	Mode of Communications	Start Date	Completion Date
<b>Health and Safety Plan approval</b>	SFSD Community	Tara Will-Superintendent	Board Approval Website All call system Social media	July 21, 2020	ongoing
<b>Accommodations Request</b>	Students with medical needs	Tara Will-Superintendent	Website	July 21, 2020	ongoing
<b>Online Learning</b>	SFSD Families	Kathy Cutchall-ES Principal Meredith Hendershot- HS Principal	Website All call system	July 21, 2020	ongoing
<b>COVID updates</b>	SFSD Community	Tara Will-Superintendent	Website All call system	July 21, 2020	ongoing

## Health and Safety Plan Summary: Southern Fulton School District

**Anticipated Launch Date:** July 21, 2020 February 8, 2021, April 20, 2021

Use these summary tables to provide your local education community with a detailed overview of your Health and Safety Plan. LEAs are required to post this summary on their website. To complete the summary, copy and paste the domain summaries from the Health and Safety Plan tables above.

### Facilities Cleaning, Sanitizing, Disinfecting and Ventilation

Requirement(s)	Strategies, Policies and Procedures
