Superintendent

ALLEN MORTON
Board President

November 13, 2018

Dear Southern Fulton Families,

As remnants of our very wet and humid summer and fall continue, Southern Fulton has conducted several air quality studies at our Elementary School after discovering small areas of mold in various classrooms.

The most recent study found elevated levels of mold spores in several classrooms. We consulted with Gladhill Services and are following their recommendation to remedy the problem. The administration has developed a plan to use alternative spaces for classrooms while our staff works to remedy the situation.

The district will continue to conduct air quality studies to ensure the environment is safe for our students and staff. I will continue to update you as we progress through this process.

Gladhill services have agreed to write a follow-up letter to our families ensuring that Southern Fulton School District has followed all proper protocols for remediation.

Thank you,

Tara Will
Superintendent
